---

## OBJECTIVE

A dedicated Software Developer with two years of professional experience and additional hands-on development experience during university. Skilled in designing and building web-based applications using technologies such as .NET Core, Java Spring Boot, PHP, Laravel, CodeIgniter, JavaScript, and ReactJS. Proficient in the full software development lifecycle from requirements gathering and system design to implementation, testing, and deployment. Known as a fast learner with strong attention to detail, and able to work effectively both independently and in team settings to deliver high-quality software solutions.

---

## EDUCATION

### SURYAKANCANA UNIVERSITY

2018 - 2022

#### Bachelor's Degree of Informatics Engineering

- **Graduate** with cumulative **GPA: 3.69/4.00** ([https://bit.ly/Transkrip\\_Saidina](https://bit.ly/Transkrip_Saidina))
  - **Learning Subjects:** Fundamental Programming, Software & Application Development, Tools & Supporting Skills
- 

## TRAINING

### PT Enigma Cipta Humanika

Feb 2023 - May 2023

#### Fulstack Developer Trainee

- **Focusing on advancing skills in Java programming language**, Spring framework, Git, and PostgreSQL database management through projects.
  - **eloping and implementing basic CRUD operations** and optimizing code for performance.
  - **Acquiring in-depth knowledge of database management using PostgreSQL**, including database design, updates, and efficient querying.
  - **Building a solid understanding of version control using Git**, facilitating effective collaboration and streamlined code management.
- 

## EXPERIENCE

### PT Integrasi Logistik Cipta Solusi

2023 May - Now

#### Software Developer

- **Develope and maintain web application** using .NET, React JS, and PHP framework.
- **Code, debug, and deploy** various application in ILCS.
- **Perform technical testing** as a part of "Journey to Cloud" to ensure system compatibility and stability during cloud migration.

### PT OTC Daihen

Dec 2022 - Jan 2023

#### Freelance Programmer

- **Develope inventory management system** for tracking incoming and outgoing goods.
- **Utilize PHP Codeigniter Framework** to create web application.

---

## PORTFOLIO

### **Pelindo Digital-Sign**

Technology: CodeIgniter 3, PDF Signing Integration, Python Flask, Node.js, PyMuPDF

A digital signature system integrated with official services like Peruri. Built using a distributed architecture with OCR for detecting signature positions in PDFs, .NET for asynchronous signing execution, and Node.js for real-time callbacks to the main CodeIgniter 3 system. Designed with secure APIs and role-based access control.

### **PDF Generation Service (Web API)**

Technology: .NET Core 8, IronPDF, Hangfire

A standalone API service for generating PDF documents, using IronPDF. Features include asynchronous document generation with Hangfire and callback mechanisms for notifying client systems upon completion.

### **Pelindo E-Office Front-End Redesign**

Technology: ReactJS, Tailwind CSS

Revamped the front-end interface of the E-Office system to improve user experience and design consistency. Used modern ReactJS architecture and Tailwind CSS for a responsive and clean layout.

### **Pelindo Cooperative System**

Technology: .NET MVC, SAP Integration, Hangfire

An internal financial system integrating SAP and Pelindo's cooperative to manage employee loans. Automatically deducts monthly installments directly from employee salaries. Uses Hangfire for asynchronous background job processing, including loan tenor calculations and salary deductions.

### **Pelindo GYM Management Application**

Technology: .NET Core, ReactJS, Hangfire

A gym scheduling platform allowing users to reserve times based on daily, periodic, or custom-date scheduling. Background job processing ensures asynchronous booking and cancellation operations.

### **Inventory Management System**

Technology: CodeIgniter 3, Barcode Scanner Integration

Developed a comprehensive stock management system supporting incoming and outgoing item tracking. Integrated barcode scanning for faster and more accurate item input and retrieval. Used by warehouse staff for real-time inventory control.

---

## TECHNICAL SKILLS

- **Languages** : C#, Java, PHP, JavaScript
- **Frameworks** : .NET Core, Spring Boot, Laravel, CodeIgniter, ReactJs
- **Database** : Oracle, PostgreSQL, MySQL
- **Tools & Tech** : Git, Docker, JMeter, Hangfire, IronPDF, Tailwind CSS, Bootstrap
- **Other Skills** : Full Stack Development, RESTful APIs, Asynchronous Processing, Usability Testing

## CERTIFICATE & OTHERS

- **Certificate** : [https://bit.ly/sertifikat\\_saidina](https://bit.ly/sertifikat_saidina)
- **Github** : <https://github.com/husen>
